Our practice is equipped with state-of-the-art technologies and amenities to make patients feel comfortable and confident they are receiving the highest standard of care. Professionally, our goal is to help you attain a beautiful smile and optimum oral health! Our friendly team of professionals strives to provide the highest quality dental care with a gentle touch.

We look forward to seeing you at your next visit!

*Sincerely,
Drs. Abbie and Logan Tucker*

Please join us in welcoming the newest additions to the Tucker Family: Our twin girls Emily Steele Tucker—5.9lbs & Elliott Avery Tucker—6.6lbs.

- One in every 2,000 babies is born with a tooth.
- All dental patterns are different. Even for identical twins.
- Elephant teeth can weigh more than 6lbs each.

Did you know?

Fun Facts

- Right-handed people tend to chew food on their right side, while left-handers chew on the left side.
- Women smile on average about 62 times a day. Men? Only about 8 times.
- Toothpaste has been used since 500 B.C.

Iron Skillet Apple Pie

Ingredients:

- 2 lbs Granny Smith apples
- 2 lbs Braeburn apples
- 1 tsp. cinnamon
- 3/4 C. sugar
- 1/2 C. butter
- 1 C. brown sugar
- 1 pkg (2) pie crusts

Directions:

Preheat the oven to 350. Peel apples and cut into 1/2 inch wedges. Toss apples with cinnamon and sugar. Melt butter in a 10-inch cast iron skillet and add brown sugar. Remove from heat and place 1 pie crust in the skillet. Add apples tossed in sugar and cinnamon and top with 2nd pie crust. Wisk an egg white and brush over the top of the crust and sprinkle with sugar. Bake at 350 for 1 hour.

How Our Office Can Help Protect Your Health

As you know, there is a growing concern in the United States about the transmission of infectious diseases.

This office complies with the regulations mandated by OSHA, CDC (Centers for Disease Control) and The American Dental Association for Infection Prevention & patient safety. To help reduce your concern about infectious disease transmission let us explain our Sterilization Protocol: Instruments are placed in cassettes for safe handling. Heat sensitive items are disinfected in a cold sterilization soak for 45 minutes. Patient instruments in cassettes are placed in an ultrasonic cleaner for 10 minutes, bagged and sterilized in a steam autoclave for 40 minutes. Our dental hand pieces are heat autoclaved between patients. The autoclave is monitored weekly by an in-office Biological Monitoring System from Hu-Friedy. All single-use patients items are disposed of after each treatment. We will be using preassembled sterile packs, which contain products for use only during your appointment. The protective barriers and disposables are used for your protection.

If you have any questions or concerns we will be happy to assist you. As always, your health is our concern.
